Education & Certificates

- B.S. in Information Technology from Cebu Technological University - Danao Campus
- National Certificate II (NC II) in Computer Systems Servicing
  Status: Expected Graduation June 2027

Projects

Full Stack Developer at ParcelHub | github.com/spadeontop/parcelhub

- Designed and developed an automated parcel pickup platform using Next.js, React Native, and Supabase to eliminate lost deliveries and streamline physical handovers.
- Built relational database tables and real-time subscription channels using Supabase PostgreSQL to eliminate manual page reloads and sync package status across devices instantly.
- Engineered an administrative web portal using Next.js, TypeScript, and Tailwind CSS to replace manual logging and enable staff to process arriving parcels quickly.
- Developed secure REST API endpoints using Next.js Route Handlers and Supabase to handle server-side parcel transactions, status updates, and client requests safely.
- Built a mobile client application using React Native to allow recipients to track packages and verify their identity securely using a personal MPIN.
- Integrated an automated intake inspection tool using Computer Vision AI to record package physical condition and eliminate disputed damage claims upon drop-off.
- Implemented a two-factor release verification protocol using dynamic QR codes and PIN validation to prevent wrong-person handovers during parcel releases.

Full-Stack Developer at Document2Reviewer | github.com/nyeowsz/document-to-reviewer

- Engineered a web application designed to parse documents and automatically generate structured reviewer notes and interactive quiz modules for examinees.
- Leveraged Generative AI using REST API to generate quiz questions with answers and interactible reviewer.
- Formulated domain-level data models to handle dynamic question types, answer keys, explanations, and user performance scoring.
- Developed a clean, responsive UI in Next.js and Tailwind CSS focused on high readability, distraction-free study modes, and instant feedback loops.
